

# we are the virus

coronavirus has no legs.  
it cannot infect anyone  
unless we carry it around.

it has no nose: it cannot  
sneeze; and it has no mouth:  
it cannot cough.

to infect and spread,  
it needs our legs, our nose  
and our mouth.

Let's stay at home.  
Let's not give our legs,  
nose and mouth to the virus.
